

J&P Technologies Joins SAIC Team on \$202 Million NASA Contract

September, 2013 – J&P Technologies is among expert companies to join the SAIC team that has been awarded a five-year contract worth up to \$202 million to provide highly specialized system software services to NASA. Under the contract, SAIC and its partners will provide Safety and Mission Assurance Engineering services. J&P Technologies is pleased to be a subcontractor on the winning team, building on our relationships with both SAIC and NASA.

“Our goal is to ensure that NASA’s complex systems meet the overall needs of each program while maintaining an acceptable level of Risk” says Jennifer Lewis – J&P’s President. “Our expertise in assuring the safety of Human Space Flight and extensive knowledge of Flight Systems, as well as Flight and Ground Support Software, are key to J&P meeting program objectives.”

J&P Technologies is a Houston-based small business, established in 1997 to provide contract services for the development, assessment, and support of integrated flight systems, scientific computing, and complex control systems, specifically in the aerospace and biomedical industries. Our highly-trained professionals have extensive experience in developing, integrating, delivering, and sustaining major human rated systems / projects at NASA and are familiar with complex development and delivery processes, as well as system support requirements. Backed by over thirty years experience in System Engineering, Safety and Mission Assurance, Software Architecture, Software Development, and System Integration/Test, J&P Technologies offers high-quality services for small and large-scale systems in both the commercial and government markets.

Science Applications International Corporation (SAIC) is a leading technology integrator that provides full lifecycle services and solutions in the technical, engineering, and enterprise IT markets. SAIC has approximately 14,000 employees worldwide, generating over \$4 billion in annual revenue.
